Art Unit: 1651

DETAILED ACTION

A response of 4/14/06 to a restriction requirement of 3/14/06 elected Group II claim 3 without traverse.

Claims 1, 2 and 4-10 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 4/14/06.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C.

10 112:

15 The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claim 3 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

25 The specification fails to describe apparatus structure in sufficient detail. No structural details of structure used for chromatography, an autosampler, chemiluminometer, flow cell, horseradish peroxidase immobilized stationary phase packed in the flow cell, and photomultiplier in contiguity with a surface of the flow

Art Unit: 1651

cell are provided. The drawing shows no structure of apparatus components used.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C.

5 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

10

Claim 3 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

15

The claim is confusing and unclear how the different components of the device function in relation to each other to determine hydrogen peroxide. Due to the specification failing to provide structural details of apparatus used, it is unclear as to structure of components required. The meaning and scope of "mobile phase passage for body fluid" is uncertain. The purpose of chromatography and how it

20

functions with the device to determine hydrogen peroxide is unclear. How do the first and second mobile phase passages differ and function together in relation to a pump and chromatography? How the chemiluminometer functions in relation to first and second passages, pumps and chromatography to determine hydrogen peroxide is unclear.

25

Conclusion

The claim is free of the prior art. The patents made of record are to show prior art relating to determining hydrogen peroxide.
